

Technology-Enabled Inbound Logistics

Smarter, Faster, More Reliable Unloading Dock Operations.

With nearly 40 years of experience, Capstone delivers best-in-class inbound warehouse services—from scheduling and unloading to receiving and put-away. Our tech-driven approach helps you streamline dock flow, reduce costs, and improve labor performance.

Capstone Technology Enhances Your Inbound Operations

Managed Receiving

Simplify
Scheduling.
Improve Dock
Flow.

Inbound Quality (IQ)

Enforce Standards.
Improve Load
Quality. Dock
Flow.

Yard Management

Real-Time
Control Over
Yard Operations

Our Technology

01 MANAGED RECEIVING (MR)

Capstone's dynamic, web-based dock scheduling tool is built to optimize inbound planning and drive performance.

- + Aligns appointments with dock capacity to reduce wait times
- + Real-time visibility improves shift and labor planning
- + Self-service scheduling boosts accountability
- + Embedded reporting supports data-driven decisions
- + Fuels our pay-for-performance labor model

02 INBOUND QUALITY (IQ)

Capstone's IQ Program verifies every load and holds vendors accountable.

- + Enhances PO accuracy and completeness
- + Cuts detention, restacks, and dock congestion
- + Saves time for site leads and clerks
- + Creates new revenue streams
- + Improves leverage in vendor negotiations

03 YARD MANAGEMENT

Our yard solution brings automation and visibility to trailer tracking and dock flow.

- + RFID tracking for real-time trailer location
- + Reduces congestion and prioritizes shipments
- + Lowers detention, labor, and fuel costs
- + Provides performance analytics for ongoing improvement
- + Scales with complex operations and large fleets
